Our latest products from the core product range

Valve series VG: VUVG / VTUG / VUWG

FESTO

The compact valve

Highlights
<ul style="list-style-type: none"> • Attractive price • Compact design • Festo quality • High flow rate • Short delivery times • Pressure range up to 10 bar • ...many more variants

Individual valves VUVG – for more power from a smaller design!
Priceattractive, impressive and installed in a flash. Perfect for all high-speed applications requiring a particularly high flow combined with a compact size, e.g. in small parts assembly and electronics industry or in the food and packaging industry.

Short on space? Not a problem!
The VUVG is designed for small installation spaces.

Fast, safe, easy
When it comes to ordering, mounting and installation – thanks to captive screws, an integrated locking seal and a wide range of pre-assembled cables and electrical connections.

Small in size – big in power
The perfect footprint: for up to 100% more flow with higher energy density.

Click! Simply snap into place.
Modular electrical connection kit (E-box) with numerous connection options for optimum integration into your system concept.

VUVG...S with specific features
The new individual valve VUVG...S offers specific features in proven Festo quality at an attractive price. As part of the core product range, it is readily available worldwide from stock in large quantities and ready for dispatch in 24 hours!

Valve series VS: VUVS/VUWS/VTUS

FESTO

The robust valve

Highlights
<ul style="list-style-type: none"> • High flow rates • Suitable for a broad range of applications • Comprehensive accessories, e.g. compressed air supply manifold secured on one side • External pilot air supply via manifold rail • Protection classes IP65 and IP67 • Easy to create pressure zones

VS – flexible, modern, robust and durable quality. Without limiting the performance data: for up to 100% more flow with higher energy density. Proven technologies and materials. Comprehensive range of accessories. Numerous mounting options and easy operation. That is what today's valves should be!

Harsh environment? No problem!
Select one of our universal piston spool valves for routine tasks. The comprehensive range of accessories includes large connector fittings and metal tubing.

Simple, cost-effective warehousing
Order pre-assembled or assemble it yourself: the proven hollow armature interface helps you to reduce the need to maintain stocks of complete components; it also allows you to determine the appropriate voltage yourself and makes mounting the coil easy.

Pre-assembled or on the manifold rail according to customer configuration
VUVS/VUWS are also available as pre-assembled units with silencers, fittings and coils as ready-to-install individual valves. With VTUS, valve manifolds can be configured to the customer's requirements

VUVS...S with specific features
The new valve VUVS...S offers specific features in proven Festo quality at an extremely attractive price. As part of the core product range, it is available worldwide from stock in large quantities and ready for dispatch in 24 hours!
