

Rubber-lined P-Clip *DIN 3016*

C Reinforced band ends prevent damage to screw holes and avoid shearing in demanding applications.

B All dimensions are marked with the application diameter, material quality and the Mikalor logo in accordance with DIN 3016.

A Manufactured in flexible material ensuring a snug fit.

D Heavy-duty electro-zinc plating on all surfaces and band edges providing excellent corrosion resistance.

E Covered with an EPDM rubber sheath which absorbs vibration and avoids friction. EPDM is also very resistant to UV light and ozone.

F Non-standard sizes available on request.

Rubber-lined P-Clip

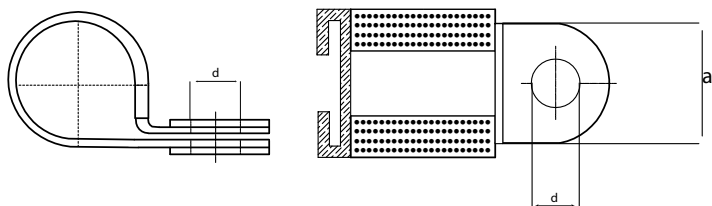

Material specifications:

W1

Band: Mild steel with reinforced screw holes at both ends
Finish: Galvanized and lined with EPDM rubber

W4

Band: Stainless steel (AISI-304) (A2) with reinforced screw holes at both ends.
Finish: EPDM rubber

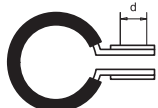

P-Clip types:

With EPDM rubber profile:
